

Save Money and Energy this Winter

Cold weather can increase natural gas use, but small changes can make a big difference. Delta Utilities offers energy efficiency tips and payment assistance resources to help you stay warm and manage your natural gas bill.

ENERGY SAVINGS TIPS

- Replace air/furnace filters monthly for safe, efficient heating.
- Seal gaps with caulk or weather-stripping to prevent heat loss.
- Run ceiling fans clockwise to push warm air down.
- Close your fireplace flue when not in use.
- Take showers rather than baths, run full loads, and use cold water for laundry.
- Upgrade to ENERGY STAR® appliances for better efficiency.

PAYMENT ASSISTANCE RESOURCES

Customers may qualify for appliance rebates. Delta Utilities also offers Levelized Billing and payment arrangements, with additional resources available through the Low Income Home Energy Assistance Program (LIHEAP).
